

FACTS FROM
FOUR HUNDRED YEARS
OF KING JAMES BIBLE EDITIONS

Bible Protector

by
Matthew Verschuur

www.bibleprotector.com

The facts from 400 years of King James Bible (KJB) editions show:

1. The text (the readings) and the translation of the KJB have not really changed since the first printing of 1611 to the standard edition of today.
2. Editing has taken place in many editions, particularly in a line of seven main editorially important revisions, culminating in the Pure Cambridge Edition (PCE).
3. There have been many minor changes, which fall into three main categories,
 - a. the correction of typographical errors from 1611 (and other years),
 - b. the standardisation of the spelling and grammar, and
 - c. other editorial regularisation, including work on italics.
4. Readers have a standard and correct presentation today, which renders other attempts at further changes as needless, and at worst, dangerous.

People who look at editions can show thousands of other exceedingly minor variations in punctuation, spelling and so on.

One reason that people could claim many more differences is because plenty of older Bibles had a few little printing or typographical errors in them. These are innocent variations which are usually obvious, and often corrected straight away.

There have been a lot of print runs of the KJB, but it has only been in the time of computers where it has been possible to eliminate all variations and typographical errors.

The KJB continues to be a common, worthy translation that Christians rely upon. The PCE is considered to be the correct and accurate edition, which links back through the accepted and legitimate editions of 1769, 1638, 1629, 1613, 1611 “she” and the first edition, the 1611 “he” Bible.

The following table is a list of the kinds of legitimate, acceptable differences that are to be found in the editorial history of the KJB. Examination of this list will confirm that there are no significant changes, and that the good old faithful Bible lives on today.
